DETAILED ACTION

Allowable Subject Matter

1. Claims 1-36 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner is unaware of any prior art which suggests a unit cell for a reversible phase change memory device such that there are two phase change layers (programmed by an electric current) with different crystallization temperatures such that the sum of the resistances of the two phase change layers at either phase (amorphous or crystalline) is different from each other.
3. Nagata et al. (USPN 6,456,584) illustrates an optical recording medium which uses two different phase change materials. However this reference does not teach the device of the applicant since an electrical current cannot be used as a means to change the phase of the layers in the Nagata device.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
